- Websocket
- Kafka

LANGUAGES

- Tamil
- English

PROFILE

I am a self-driven and passionate Software Developer with a strong background in backend web development, specializing in building scalable systems and integrating complex platforms. My expertise lies in creating efficient, automated solutions, including reconciliation service apps and AI-driven platforms.

WORK EXPERIENCE

2022 - PRESENT

Software Developer
Adya, Hyderabad.

- Engineered the backend of a centralized e-commerce platform using GO Lang and Node js, adhering to ONDC Protocol standards, improving platform scalability.
- Integrated multiple marketplaces, webstores, and shipping partners into an omnichannel platform, streamlining seller management processes and enhancing system usability.
- Developed a standalone Reconciliation Service Provider (RSP) app under the ONDC protocol to streamline and automate transaction reconciliation processes, ensuring accurate settlements between network participants.
- Contributed to the development of the Onest Protocol, enabling an online marketplace for buying and selling courses and facilitating seamless connections between job seekers and job providers.
- Currently developing the Vanij Project, a platform that enables users to create and customize their own AI-driven models, copilots, and agents.
